Career Objective

Curious and motivated fresher actively transitioning into the software industry. Passionate about problem-solving and building practical solutions while continuously improving my skills. Eager to apply my analytical thinking, adaptability, and willingness to learn to start a career in software development.

Education

B-tech Mechanical Engineering

NSS College of Engineering Palakkad

2018 – 2022

Higher Secondary

GMHSS Varkala

2016 – 2018

High School

St John's HS Kurumannu

2015 – 2016

Projects

Weight Loss Management Site

- **Developed a Django-based weight tracking web app** with user authentication, daily weight entry restriction, automatic date recording, and progress tracking.
- **Implemented CRUD operations** for managing and viewing weight history efficiently.

Daily Water Intake Site

- **Developed a full-stack water tracking app** using Django (backend) and React.js (frontend) with a REST API for seamless communication.
- Implemented user authentication, daily intake logging with date recording, entry restrictions, hydration trend analysis, and full CRUD operations.

Movie Streaming Website

- Built a full-stack movie streaming platform with a React-based UI and a custom admin panel built using Django templates, implementing authentication, dynamic movie listings, REST API integration, and full CRUD operations for managing movie data.

Skills

Programming Languages — Python | Javascript | SQL

Web Technologies — HTML | CSS

Backend Development — Django

Frontend Development — React.js | Bootstrap

Databases — MySQL

Other skills — REST API

Version Control — Git

Tools & IDEs — VS Code | Sublime Text

Soft skills — Problem Solving, Teamwork

Certificates

- Programming for Everybody (Getting Started with Python), offered by the University of Michigan on Coursera
- Python Data Structures, offered by the University of Michigan on Coursera
- Front End Development Libraries Certification by freeCodeCamp
- JavaScript Algorithms and Data Structures Certification, offered by freeCodeCamp

Group Project

Automatic Solar Panel Cleaner

- Designed and developed an automated solar panel cleaning system with a dry cleaning mechanism using silicone foam rubber. Improved solar efficiency by reducing dust, minimizing water usage, and enabling autonomous operation
